PROFILE

My name is Emily Wivell and I am a programmer. I think logically and I prefer my to-do lists full and checked off. I live for solving problems and adding value to those around me. As a recent graduate from the Back End Engineering Program at The Iron Yard, I am excited to share my knowledge and skills of programming to improve the technology community. I want to absorb all that I can from those around me to make me a better programmer and person.
